

Beaded Phone Charm

This is an easy beading project suitable for beginners and even kids.

You will need:

- 1x mobile phone cord
- 5x 8mm glass cube crackle beads
- 1x 16mm silver plated headpin
- 4x 19mm silver plated eyepins
- Round nose pliers
- Long nose pliers

Start by inserting the 16mm silver plated headpin through your choice of bead and bending the excess pin as on the image to the right.

Using the round nose pliers on the headpin, turn the excess pin to create a loop as on the image below. Open it slightly with the long nose pliers to insert the loop from one of the eyepins.

Continue adding eyepins to the previous eyepins until you have all 5 beads attached to one another.

Then open the jump ring on the mobile phone cord and attach the length of beads. Now you can hang it on your mobile phone.

You can also attach charms or other beads which are available from our store.

Enjoy your beading!
